NEW! MICHELIN® X® TWEEL® SSL 2 AIRLESS RADIAL TIRE
FOR SKID STEERS AND LIGHT CONSTRUCTION EQUIPMENT

MICHELIN® X® TWEEL® SSL 2 airless radial tires are available in two tread patterns: All Terrain and Hard Surface Traction. This second generation MICHELIN X TWEEL SSL offers significant new benefits, including:

- Improved shear beam construction engineered to maximize core life. (1)
- New spoke material helps provide up to 10 times greater spoke life compared to the previous models. (2)
- New interlocked hub designed to increase durability in demanding conditions.

KEY FEATURES

1. Deep open tread (AT) designed for excellent cleaning and traction. A deep layer of undertread means the core can be retreaded again and again.

2. Zero degree belts (under the tread) and proprietary design provide great lateral stiffness, while resisting damage and absorbing impacts.

3. Michelin’s proprietary Comp10 Cable™ forms a semi-rigid “shear beam”, and allows the load to hang from the top.

4. Universal, 8 hole, interlocking heavy gauge steel hub for robust attachment to the machine.

5. High strength, poly-resin spokes carry the load and absorb impacts, help dampen the ride, and provide a unique energy transfer that reduces pneumatic bounce.

---

(1) On an internal drum endurance test, the MICHELIN X TWEEL SSL 2 with a new shear beam construction lasted over twice as long as the original design.

(2) Under testing measuring crack growth under fully relaxed conditions, the new spoke material had a crack growth rate that was nearly 10 times slower than the original material.
Includes improved shear beam and new spoke material introduced with SSL 2, but does not include the SSL 2 interlocking hub.
